Granulati Zandobbio is the representative point for the production and distribution of a wide range of products for landscape architecture: sintered stone and natural stone paving. The one supplier for the widest selection in terms of colors and sizes for the development of the outdoors.

Granulati Zandobbio è il punto di riferimento nella produzione e distribuzione di un'ampia gamma di prodotti legati al mondo dell'architettura del paesaggio: pavimentazioni in pietra sinterizzata e pietra naturale. Il fornitore unico di materiali con la più ampia selezione in termini di colori e formati per i progetti degli spazi esterni.

Granulati Zandobbio ist der italienische Spezialist für die Produktion und den Vertrieb einer breiten Palette von Produkten für die Landschaftsarchitektur: Feinsteinzeug und Naturstein. Dieses einzigartige Sortiment zeichnet sich durch eine breite Auswahl von Farben und Materialien für den Außenbereich aus.

Granulati Zandobbio est une référence pour la production et la distribution d'une vaste gamme de produits pour l'architecture de paysage: le grès cérame et les pavés en pierre naturelle. La source ponctuelle pour le choix le plus large en termes de couleurs et de tailles pour les projets d'aménagement exterieur.

CERA-PANEL

SINTERED STONE
Sintered stone, high-end porcelain stoneware, is a very versatile artificial material for the numerous uses in infinite projects of external and internal environments. It can in fact be used for paving and cladding, for ventilated facades and swimming pools. It is made up of a special blend of natural minerals selected for their high quality, compacted and joined through a process that does not require the use of resins and chemical binders called sinterization process. The surface obtained is characterized by its extreme resistance to scratches, high temperatures, chemical agents and UV rays, in addition to a high ability to resist stains, an almost zero absorption factor and high mechanical strength.

PIETRA SINTERIZZATA
La pietra sinterizzata, ovvero gres porcellanato di alta qualità, è un materiale artificiale molto versatile per i numerosi impieghi in infiniti progetti di ambienti esterni e interni. Può essere infatti utilizzata per pavimentazioni e rivestimenti, per facciate ventilate e piscine. E' formata da una speciale miscela di minerali naturali selezionati per la loro alta qualità, compattati e uniti attraverso un processo che non richiede l'uso di resine e leganti chimici chiamato processo di sinterizzazione. La superficie ottenuta si caratterizza per l'estrema resistenza ai graffi, alle alte temperature, agli agenti chimici e ai raggi UV, oltre a un'elevata capacità di resistere alle macchie, un grado di assorbimento quasi nullo ed un'elevata resistenza meccanica.

FEINSTEINZEUG
Feinsteinzeug ist ein sehr vielseitiger Werkstoff, der für zahlreiche Projekte für den Innen - und Außenbereich angewendet werden kann. Tatsächlich kann er für Bodenbeläge und Verkleidungen, hinterlüftete Fassaden und Schwimmbäder verwendet werden. Er besteht aus einer speziellen Mischung natürlicher Mineralen, die wegen Ihrer hochwertigen Qualität ausgewählt, gepresst und durch einen Prozess namens "Sintern" kombiniert werden. Das Sintern sieht die Nutzung von Harzen und Bindemitteln nicht vor. Die dadurch entstandene Oberfläche ist durch eine extreme Festigkeit gegen Kratzer, Temperaturschwankungen, chemischen Produkten und UV-Strahlen sehr resistent. Außerdem ist sie beständig gegen Flecken, sie absorbiert nicht und sie hat eine starke mechanische Festigkeit.

GRÈS CÉRAME
Le grès cérame est un matériau artificiel très polyvalent qui peut être utilisé dans d'innombrables projets d'extérieur et d'intérieur. Il peut être utilisé pour les sols et les revêtements, pour les façades ventilées et les piscines. Il s'agit d'un mélange spécial de minéraux naturels sélectionnés pour leur grande qualité, compactés et assemblés par un procédé qui ne nécessite pas l'utilisation de résines et de liants chimiques qu'on apelle frittage. La surface obtenue est caractérisée par son extrême résistance aux rayures, aux températures élevées, aux agents chimiques et aux rayons UV, outre la résistance aux taches, un degré d'absorption presque nul et une grande résistance mécanique.

HARDSCAPE PORCELAIN® is a versatile and accessible brand in sintered stone, high-end porcelain stoneware, with a contemporary design, dedicated to outdoor spaces. Sober elegance along with technical and tactile surfaces are combined with concrete or neutral tones for a minimal design and for settings characterized by strong contrasts. The brand ensures anti-slip and high-technical performance.

HARDSCAPE PORCELAIN® è un marchio versatile e accessibile in pietra sinterizzata, gres porcellanato di alta qualità, dal design contemporaneo, dedicato agli spazi esterni. Sobria eleganza e superficie tattile molto tecnica da abbinare a look cemento o toni neutri per un design minimal e per ambientazioni caratterizzate da decisi contrasti. Il brand assicura prestazioni antiscivolo e offre elevate prestazioni tecniche.

HARDSCAPE PORCELAIN® ist eine vielseitige und zugängliche Marke aus Feinsteinzeug mit einem zeitgenössischen Design, die sich dem Außenbereich widmet. Nüchterne Eleganz und sehr technische taktile Oberfläche, die mit Beton oder neutralen Tönen für ein minimales Design und für Umgebungen mit starken Kontrasten kombiniert werden kann. Die Marke gewährleistet eine rutschfeste Leistung und bietet eine hohe technische Performance.

HARDSCAPE PORCELAIN® est une marque polyvalente et accessible en grès cérame au design contemporain, dédiée aux espaces extérieurs. Une élégance sobre et une surface tactile très technique à combiner avec des tons béton ou neutres pour un design minimal et pour des environnements caractérisés par de forts contrastes. La marque assure des performances anti glissement et offre des performances techniques élevées.

OUTDOOR WOOD 2 CM, the only brand in high thick sintered stone, high-end porcelain stoneware, entirely dedicated to the reproduction of wood. Finishes designed with attention to detail for reproducing the most authentic and essential touch of wood for any purpose, ensure unparalleled style authenticity along with technical, practical and functional performance which belongs to sintered stone.

OUTDOOR WOOD 2 CM, l'unico marchio in pietra sinterizzata, gres porcellanato di alta qualità, ad alto spessore interamente dedicato alla riproduzione del legno. Finiture curate nei minimi dettagli per riprodurre il sapore più autentico ed essenziale del legno per qualsiasi destinazione d'uso, assicurando un'autenticità di stile impareggiabile e le prestazioni tecniche, pratiche e funzionali che appartengono alla pietra sinterizzata.

OUTDOOR WOOD 2 CM, die einzige Marke für Feinsteinzeug in 2 Stärken, die sich ausschließlich der Reproduktion von Holz widmet. Mit Liebe zum Detail, um den authentischsten und wesentlichsten Holzgeschmack für jeden Zweck zu reproduzieren, wobei eine unvergleichliche Stilechtheit und die technischen, praktischen und funktionellen Leistungen, die zu Sintergestein gehören, gewährleistet werden.

OUTDOOR WOOD 2 CM, la seule marque du grès cérame de haute épaisseur entièrement dédiée au reproduction du bois. Finit avec une attention aux moindres détails pour reproduire le gout le plus authentique et essentielle de la bois pour tout usage prévu, garantissant une authenticité de style inégalée et les performances techniques, pratiques et fonctionnelles qui appartiennent à le grès cérame.

SUPER HARD KERAMIK 3 CM

15x30x3 cm 6"x12"x1.2"	60x60x3 cm 24"x24"x1.2"	40x80x3 cm 16"x32"x1.2"	80x80x3 cm 32"x32"x1.2"
90x90x3 cm 36"x36"x1.2"	40x60x3 cm 16"x24"x1.2"	40x120x3 cm 16"x48"x1.2"	

SUPER HARD KERAMIK 3 CM is the extremely robust outdoor paving designed to be durable over time. Drive-over even if laid dry on gravel or sand. Ideal to be laid on floating paving systems using a minimum number of pedestals, both in public contexts and private, ensuring greater safety compared to thinner paving. 3 cm (1.2") high-end porcelain stoneware choice is the union of functional and aesthetic needs.

SUPER HARD KERAMIK 3 CM è la pavimentazione per esterni estremamente robusta, progettata per essere resistente nel tempo. Carrabile anche se posato a secco su ghiaia o sabbia. Ideale per essere posata su terrazze galleggianti mediante l'utilizzo di un minor numero di piedini, sia in contesti pubblici che privati, garantendo inoltre una maggiore sicurezza rispetto agli spessori inferiori. La scelta del gres porcellanato di alta qualità in 3 cm di spessore è l'incontro di esigenze funzionali ed estetiche.

SUPER HARD KERAMIK 3 CM ist ein extrem robuster Bodenbelag für den Außenbereich, der für eine lange Lebensdauer ausgelegt ist. Kann auch trocken auf Kies oder Sand gelegt werden. Ideal für die Verlegung auf einer schwimmenden Terrasse durch die Verwendung einer geringeren Anzahl von Stelzfüßen, sowohl im öffentlichen als auch im privaten Bereich, was auch eine größere Sicherheit im Vergleich zu geringeren Stärken gewährleistet. Die Wahl des 3 cm starken Hochwertigem Feinsteinzeug, entspricht den funktionellen und ästhetischen Anforderungen.

SUPER HARD KERAMIK 3 CM est le sol d'extérieur extrêmement robuste, conçu pour être résistant dans le temps. Carossabale meme s'il est posé à sec sur du gravier ou bien sable. Idéal pour poser sur des terrasses flottantes en utilisant moins de pieds, dans les deux contextes public et privé, garantissant également une plus grande sécurité par rapport aux épaisseurs plus faibles. Le choix du grès cérame de haute qualité de 3 cm répond aux besoins fonctionnels et esthétiques.

®STONEGRES

Versatility and contemporary taste for residential contexts. STONE GRES® is a sintered stone, high-end porcelain stoneware, brand dedicated entirely to gardening and D-I-Y. The proposal not only includes stepping stones of various shapes and colors, but also slabs with an antique look that imitate natural stone in veining and shape. The collection also includes the first cobblestone in sintered stone, a unique product suitable for both residential and public projects.

Versatilità e gusto contemporaneo per contesti residenziali. STONE GRES® è un marchio in pietra sinterizzata, gres porcellanato di alta qualità, dedicato interamente al giardinaggio e il fai-da-te. La proposta comprende camminamenti di varie forme e colori, ma anche lastre dall'aspetto anticato che imitano la pietra nelle venature ma anche nella forma. La collezione si estende inoltre a presentare il primo sanpietrino in pietra sinterizzata, un prodotto unico adatto per progetti residenziali ma anche pubblici.

Vielseitigkeit und zeitgenössischer Geschmack für Wohnkontexte. STONE GRES® ist eine Marke für Feinsteinzeug die sich ganz dem Gartenbau und dem Heimwerken widmet. Der Vorschlag umfasst nicht nur Trittsteine in verschiedenen Formen und Farben, sondern auch Platten mit antikem Aussehen, die in ihrer Aderung, aber auch in ihrer Form Stein imitieren. Die Sammlung umfasst auch den ersten Pflasterstein aus Feinsteinzeug, ein einzigartiges Produkt, das sich sowohl für private als auch öffentliche Projekte eignet.

Polyvalence et goût contemporain pour les contextes résidentiels. STONE GRES® est une marque de grès cérame entièrement dédiée au jardinage et au bricolage. La proposition comprend des passerelles de différentes formes et couleurs, mais aussi des dalles d'aspect antique qui imitent la pierre dans les veines mais aussi dans la forme. La collection s'étend également pour présenter le premier pavé en grès cérame, un produit unique adapté aux projets résidentiels mais aussi publics.

The slabs are rectified before burning on part of the thickness in order to lower the conicity typical of unrectified slabs.

Le lastre vengono rettificate a crudo su parte dello spessore al fine di ridurre la conicità tipica delle lastre non rettificate.

Die Platten werden vor dem Brennen auf einen Teil der Höhe Rektifiziert um bessere Eigenschaften wie bei der Naturkante zu haben.

Les dalles sont rectifiées sur une partie de l'épaisseur avant la cuisson pour réduire leur valeur typique de conicité.

The slabs include spacers that guarantee joints thickness and reduce laying times.

Le lastre includono distanziali ideati per garantire la fuga costante e ridurre i tempi di posa.

Das Pflaster hat Abstandshalter, die den Fugenabstand garantieren. Das verkürzt die Verlegezeit sehr.

Les dalles contiennent des entretoises conçues pour assurer des jointures uniformes et réduire le temps d'installation.

COMBINE
INDOOR & OUTDOOR

HARENA CALANCA LIGHT, 60x120x1 cm (24"x48"x0.4")

Thanks to Combine Indoor & Outdoor with reduced thickness slabs, designed for indoor environments, it is possible to furnish any kind of space with elegance, creating a surface continuity combination between different indoor and outdoor environments.

Grazie alle lastre a spessore ridotto Combine Indoor & Outdoor, pensate e dedicate all'utilizzo interno, si arreda con eleganza ogni tipo di spazio, creando una combinazione in continuità di superficie tra ambienti differenti, interni ed esterni.

Dank der Ausführungen in geringerer Dicke von Combine Indoor & Outdoor, die eigens für den Gebrauch im Inneren entwickelt wurden, gestaltet man jede Umgebung mit Eleganz, indem man eine Kombination von kontinuierlichen Oberflächen zwischen unterschiedlichen Bereichen, innen und außen schafft.

Grâce aux dalles à épaisseur réduite, Combine Indoor & Outdoor, pensées et destinées à une utilisation en intérieur, s'accorde avec élégance à n'importe quel type d'espace en créant une combinaison en surface continue entre des milieux différents, intérieurs et extérieurs.

SPECIAL SERVICE

OUTDOOR FURNITURE

ARREDO ESTERNO
MÖBEL FÜR DEN AUßENBEREICH
MOBILIER D'EXTÉRIEUR

A new way of designing the outdoors: flowerpot, seats, vases, benches and bollards in sintered stone for parks, terraces, gardens, courtyards and squares. The combination of these elements allows the realization of a real modular system with products of the same tone, color and material.

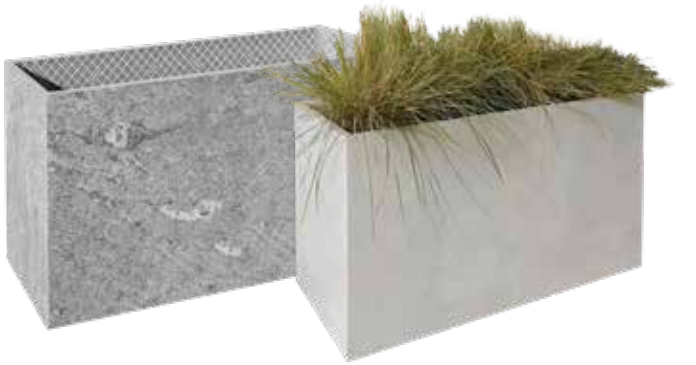

Un nuovo modo di progettare l'outdoor: fioriere, sedute, vasi, panchine e dissuasori in pietra sinterizzata per parchi, terrazzi, giardini, cortili e piazze. La combinazione di questi elementi permette la realizzizazione di un vero e proprio sistema modulare con prodotti dello stesso tono, colore e materiale.

Eine neue Art, den Außenbereich zu gestalten: Blumentöpfe, Sitzgelegenheiten, Vasen, Bänke und Poller aus Feinsteinzeug für Parks, Terrassen, Gärten, Höfe und Plätze. Die Kombination dieser Elemente ermöglicht die Realisierung eines echten modularen Systems mit Produkten im gleichen Ton, in der gleichen Farbe und im gleichen Material.

Une nouvelle façon de concevoir l'extérieur: pots de fleurs, sièges, vases, bancs et bornes en grès cérame pour parcs, terrasses, jardins, cours et places. La combinaison de ces éléments permet la réalisation d'un véritable système modulaire avec des produits de même ton, couleur et matière.

In public zones or private gardens, in the presence of lawn slabs, they can be laid dry on top of grass without using any adhesives. This allows you to change the flooring at any time and to reuse the same slabs several times. Dry laying does not require the intervention of specialized professionals and is immediately walkable.

In presenza di fondi erbosi, sia in abitazioni private che in aree pubbliche, le lastre vengono posate a secco sul basamento senza l'utilizzo di collanti edilizi. Ciò permette di modificare le pavimentazioni in qualsiasi momento e di riutilizzare le stesse lastre più volte. La posa a secco non richiede l'intervento di professionisti specializzati e risulta immediatamente calpestabile.

Bei Rasenflächen in privaten oder öffentlichen Gärten werden die Platten trocken auf dem Untergrund, ohne Verwendung von Bauklebern, verlegt. Auf diese Weise können die Böden jederzeit geändert und die selben Platten mehrmals wiederverwendet werden. Für die Trockenverlegung werden keine Fachleute benötigt und der Boden ist sofort begehbar.

En présence d'herbe, dans les jardins privés ou dans les zones publiques, les dalles sont posées à sec sur la base sans colles techniques. Cela permet de modifier les pavages à tout moment et de réutiliser les dalles plusieures fois. La pose à sec n'exige pas l'intervention de spécialistes et elle est immédiatement praticable.

DRY-LAY INSTALLATION ON SAND OR GRAVEL

POSA A SECCO IN APPOGGIO SU SABBIA O GHIAIA
TROCKENE VERLEGUNG DURCH AUFLAGE AUF SAND ODER KIES
POSE À SEC EN APPUI SUR SABLE OU GRAVIER

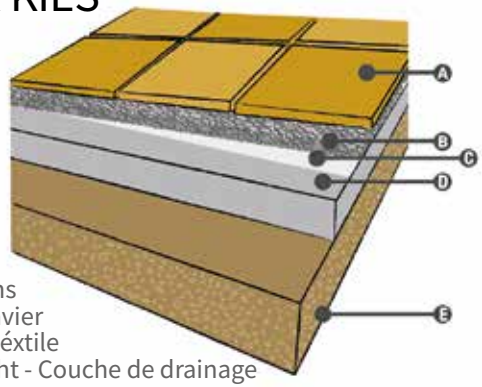

The slabs can be laid dry without the need adhesives. This means the slabs are easily levelled out on top of the sand/gravel and are ready for use immediately afterwards. This allows users to change the paving at any time or reuse the same material several times, even in different locations.

Le lastre si possono posare a secco senza l'utilizzo di collanti edilizi. Ciò permette di assestare e livellare velocemente la lastra sulla sabbia/ghiaia risultando immediatamente calpestabile.Questo metodo permette di modificare il disegno di posa in qualsiasi momento o di riutilizzare le stesse lastre più volte anche in contesti diversi.

Die Platten können ohne Klebstoffe trocken verlegt werden. Dadurch lassen sich die Platten einfach auf dem Sand/Kies nivellieren und sind danach sofort einsatzbereit. So kann der Nutzer den Belag jederzeit wechseln oder das gleiche Material mehrmals wiederverwenden, auch an unterschiedlichen Orten.

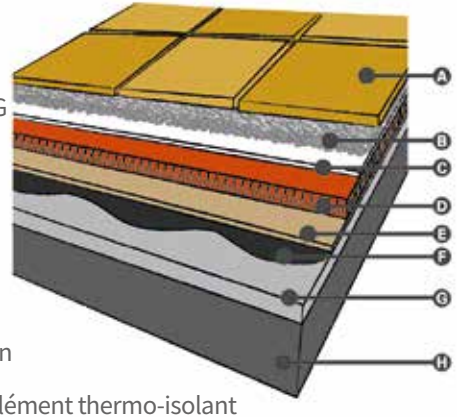

Les dalles peuvent être posées à sec sans avoir besoin de colles. Cela signifie que les dalles sont facilement nivelées sur le sable/gravier et sont prêtes à l'emploi immédiatement après. Cela permet aux utilisateurs de changer de pavage à tout moment ou de réutiliser plusieurs fois le même matériau, même à des endroits différents.

  Ideale per circolazioni pedonali intense
  Ideal für eine intensive Fußgängerzirkulation
  Idéal pour une circulation piétonne intense

The advanced technical features of the sintered stone collections, combined with an adhesive laying technique on screed, allow users to create perfectly stable and exceptionally hard-wearing surfaces. The slabs used with this solution can withstand both moving and parked vehicles. Ideal for heavily frequented areas, in particular for squares, pavements, or ramps. Expansion joints are necessary and joints must be filled with cementitious grout.

Le elevate caratteristiche tecniche delle collezioni in pietra sinterizzata combinate alla soluzione di posa a colla su massetto permettono di generare superfici perfettamente stabili ed eccezionalmente resistenti. Le lastre utilizzate con questa soluzione sono in grado di sopportare il passaggio e la sosta di autoveicoli. Ideali per tutte le strutture urbane molto frequentate quali piazze, marciapiedi o rampe. Sono necessari i giunti di dilatazione e le fughe tra le lastre devono essere riempite con stucco cementizio.

Die fortschrittlichen technischen Merkmale der Feinsteinzeug kollektionen in Kombination mit einer klebenden Verlegetechnik auf Estrich ermöglichen es dem Benutzer, perfekt stabile und außergewöhnlich strapazierfähige Oberflächen zu schaffen. Die mit dieser Lösung verwendeten Platten können sowohl fahrenden als auch geparkten Fahrzeugen standhalten. Ideal für stark frequentierte Bereiche, insbesondere für Plätze, Gehwege oder Rampen. Dehnungsfugen sind notwendig und Fugen müssen mit Zementmörtel gefüllt werden.

Les caractéristiques techniques avancées de la collection en grès cérame combinées avec la solution de pose adhésive sur la chape , elles permettent de créer surfaces parfaitement stables et exceptionnellement résistantes. Les dalles utilisées avec cette solution-ci, elles peuvent soutenir le passage et l'arrêt de voitures. Idéales pour toutes les structures urbaines souvent fréquentées comme places, trottoirs ou rampes. Les jointures sont nécessaires et elles doivent etre jointoyes avec ciment.

  Ideale per circolazioni pedonali intense - Ideal für eine intensive Fußgängerzirkulation - Idéal pour une circulation piétonne intense

The slabs are laid on a base of sand mixed with cement. This technique guarantees the slabs long term stability and their vehicle accessibility. It also allows to lay the slabs straight on the floor screed avoiding the high costs of the levelling screed arrangements. Expansion joints are necessary and joints must be filled with cementitious grout.

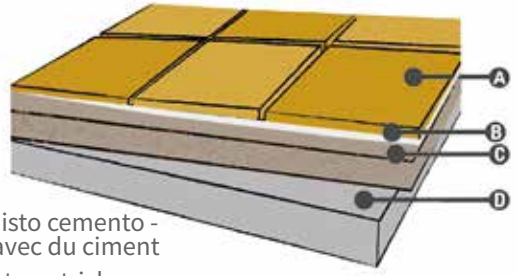

Le lastre vengono posate su una base di sabbia mista a cemento, questa tecnica garantisce la stabilità delle lastre a lungo termine e la carrabilità. Inoltre permette di posare le lastre direttamente su massetto evitando i costi elevati di predisposizione della caldana. Sono necessari i giunti di dilatazione e le fughe tra le lastre devono essere riempite con stucco cementizio.

Die Platten werden auf eine mit Zement vermischte Sandbasis gelegt. Diese Technik garantiert die Langzeitstabilität der Platten und ihre Zugänglichkeit für Fahrzeuge. Es ermöglicht auch, die Platten gerade auf den Estrich zu legen, wodurch die hohen Kosten der Nivellierestrichanordnungen vermieden werden. Dehnungsfugen sind notwendig und Fugen müssen mit Zementmörtel gefüllt werden.

Les dalles sont posées sur une base de sable mixée avec du ciment, cette technique-ci garantie la stabilité des allées à long temps et sa caractéristique carrossable. De plus elle permet de poser les dalles directement sur la chape, en évitant coûts élevés pour niveler. Les jointures sont nécessaires et elles doivent être jointoyes avec ciment.

  Schnelles Ablaufen des Wassers
  Rapide ecoulement de l'eau

- Ecological and clean
  Ecologia e pulizia
  Ökologisch und sauber
  Ecologie et propreté

Floating paving is composed by a series of modular and adjustable supports, that easily and safely adapt to all paving types. Designed to guarantee an homogeneous surface, without bringing radical changes to the existing structure, as well as to eliminate humidity problems, water infiltrations, passage of electric cables and pipes, floating paving solutions allow easy and quick inspections and rainwater efficient drainage.

Il pavimento sopraelevato è composto da una serie di supporti modulari, che con semplicità e sicurezza si adatta ad ogni tipo di superficie. Ideata per garantire sempre una pavimentazione omogenea, senza apportare interventi radicali alla struttura preesistente ed eliminare i problemi di umidità, infiltrazioni d'acqua, passaggio di cavi o tubi, permettendo una facile e veloce ispezionabilità e un efficace smaltimento delle acque meteoriche.

Schwimmende Verlegung besteht aus einer Reihe von modularen und verstellbaren Stützen, die so einfach sind und sich sicher an alle Flächen anpassen. Entwickelt, um eine homogene Oberfläche zu schaffen, ohne radikale Änderungen an der bestehenden Struktur, sowie zu beseitigen Feuchtigkeitsprobleme, Wasserinfiltrationen, Durch führen von elektrischen Kabeln und Rohren, schwimmend Verlegung ermöglichen einfache und schnelle Inspektionen und eine effiziente Entwässerung des Regenwassers.

Le dallage surélevé est composé par une série de supports modulaires, qui, avec simplicité et sécurité, s'adaptent à chaque type de surface. Idée pour garantir toujours un dallage uniforme, sans apporter des modifications radicales à la structure préexistant et éliminer les problèmes d'humidité, d'infiltration de l'eau, de passage de câbles et tuyau, en permettant une inspection rapide et facile et un drainage de l'eau de pluie efficace.

ADJUSTMENT KEY

CHIAVE DI REGOLAZIONE - REGULIERUNGSSCHLÜSSEL - CLEF DE REGLAGE

Adjustable supports offer many solutions to compensate any surface small imperfections and high slopes, in order to create pavings that are always levelled and stable. The exclusive adjustment key adjusts supports (and consequently the overlaying floor) even in case of finished floor, without lifting it.

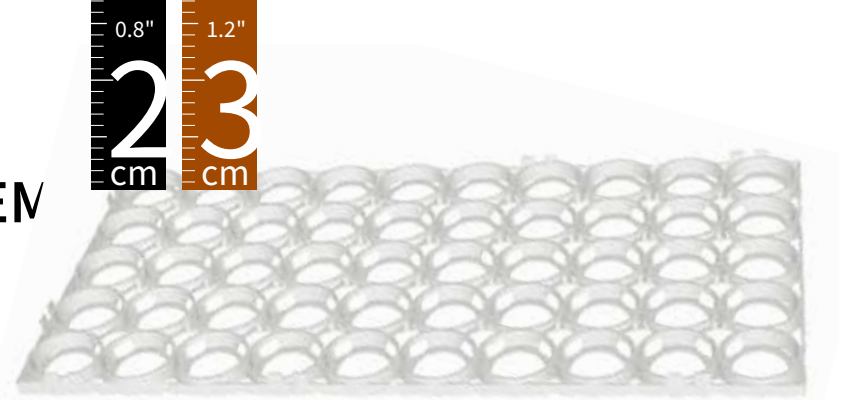

I supporti regolabili offrono molteplici soluzioni per compensare piccole imperfezioni e grandi pendenze di qualsiasi piano di posa così da realizzare sempre pavimentazioni perfettamente stabili e piane. L’esclusiva chiave di regolazione, permette la regolazione dei supporti (e conseguentemente del pavimento soprastante) anche a pavimento finito evitando pertanto di doverlo sollevare.

Die einstellbaren Stützen bieten zahlreiche Lösungen, um kleine Unregelmäßigkeiten und große Neigungen jeder beliebigen Auflagefläche auszugleichen, so dass immer perfekt stabile und ebene Bodenbeläge entstehen. Der exklusive Regulierungsschlüssel ermöglicht die Einstellung der Stützen (und damit des darüber liegenden Fußbodens) auch nachdem der Bodenbelag fertig ist, wodurch sein Anheben vermieden wird.

Les supports réglables offrent de multiples solutions pour compenser les petites imperfections et les grandes déclivités de n’importe quelle surface de pose de façon à toujours réaliser des pavements parfaitement stables et plats. La clef de réglage exclusive permet de régler les supports (et donc le revêtement du dessus) même lorsque le pavement est terminé si bien qu’il n’est plus nécessaire de le soulever.

EASY PAVING
THE NEW INSTALLATION SYSTEM
IL NUOVO SISTEMA DI INSTALLAZIONE
DAS NEUE VERLEGESYSTEM
LE NOUVEAU SYSTÈME D'INSTALLATION

A product by Granulati Zandobbio, designed to ease the laying of sintered stone paving with 40x80 cm slabs in two different thicknesses: 2 and 3 cm. The product is made of 100% postconsumer recycled plastic and it is 100% recyclable after its use. The dry laying simplifies and speeds up installation which does not require glue or concrete. Its structure was designed to avoid chipping and keep the joint thickness constant along the entire paving, without the use of spacers.

Un prodotto di Granulati Zandobbio, ideato per facilitare la posa di pavimentazioni in pietra sinterizzata con lastre 40x80 cm in due diversi spessori: 2 e 3 cm. Il prodotto è composto al 100% da plastica riciclata post consumo ed è riciclabile al 100% dopo il suo utilizzo. La posa in appoggio semplifica e velocizza l'installazione che non necessita di colla o cemento. La sua struttura è stata ideata per evitare sbeccature e mantenere la fuga costante lungo tutta la pavimentazione, senza l'ausilio di distanziatori.

Ein Produkt von Granulati Zandobbio das entwickelt wurde, um das Verlegen von Feinsteinzeug in den Maß 40x80 in den Stärken 2 und 3 cm zu erleichtern. Das Produkt besteht zu 100% aus recyceltem Kunststoff und ist nach seiner Verwendung vollständig recycelbar. Die Trockenverlegung vereinfacht und beschleunigt die Installation, weil zum Beispiel keinerlei Kleber eingesetzt werden muss. Seine Struktur wurde entwickelt, um Abplatzungen zu vermeiden und um die Fugenbreite konstant zu halten, ohne dass Abstandshalter verwendet werden müssen.

Le Easy Paving est conçu par Granulati Zandobbio, pour simplifier la pose des dalles en grès cérame format 40x80 cm, Ép. 2 et 3 cm. C'est un produit fabriqué avec du plastique recyclé à 100 % postconsommation et peut être réutilisé. La pose en appui simplifie sa mise en oeuvre sans devoir utiliser de la colle ni faire usage de ciment. Sa structure est réalisée non seulement pour éviter les ébréchures mais aussi pour assurer un drainage constant sans faire usage de joints de carrelage.

VENTILATED FAÇADES, KERF SYSTEM
FACCIATE VENTILATE, SISTEMA KERF
BELÜFTETE FASSADEN, KERF-TECHNOLOGIE
FACADES VENTILÉES, SYSTÈME DE KERF

A: Slab - Lastra - Platte - Dalle
B: Bracket - Staffa - Klammer - Support
C: Structure - Struttura - Struktur - Structure
D: Wall - Muro - Wand - Mur

The KERF technology applied to the 2 cm slabs allows the cladding to be anchored in total safety by means of brackets that allow the upper slab to be supported and prevent the one below from overturning. In addition to the obvious functional advantages, it allows to contain costs and guarantees greater impact resistance than other systems. Maximum recommended size 120x120x2 cm.

La tecnologia KERF applicata alle lastre di 2 cm permette l'ancoraggio in totale sicurezza del rivestimento mediante staffette che consentono di sostenere la lastra superiore ed impedire il ribaltamento di quella sottostante. Oltre agli evidenti vantaggi funzionali consente di contenere i costi e garantisce una maggiore resistenza all'urto rispetto ad altri sistemi. Dimensione massima consigliata 120x120x2 cm.

Die KERF-Technologie, die auf die 2-cm-Platten angewendet wird, ermöglicht eine absolut sichere Verankerung der Verkleidung mit Hilfe von Bügeln, die es ermöglichen, die obere Platte zu stützen und das Umkippen der darunter liegenden Platte zu verhindern. Neben den offensichtlichen funktionalen Vorteilen ermöglicht es eine Kosteneinsparung und garantiert eine höhere Stoßfestigkeit als andere Systeme. Maximal empfohlene Größe 120 x 120 x 2 cm.

La technologie KERF appliquée aux dalles de 2 cm permet d'ancrer le bardage en toute sécurité grâce à des équerres qui permettent de soutenir la dalle supérieure et d'éviter que celle du dessous ne se renverse. En plus des avantages fonctionnels évidents, il permet de contenir les coûts et garantit une plus grande résistance aux chocs que les autres systèmes. Taille maximale recommandée 120x120x2 cm.

CERA PANEL sintered stone cladding slabs are extremely easy to install, in fact they only require the use of a suitable adhesive. They are ideal for both outdoor and indoor environments.

Le lastre per rivestimenti in pietra sinterizzata CERA PANEL sono estremamente facili da installare, necessitano infatti solo dell'utilizzo di colla apposita. Sono ideali sia per gli ambienti esterni, sia per quelli interni.

CERA PANEL Fassadenplatten aus gesintertem Stein sind extrem einfach zu montieren, sie erfordern tatsächlich nur die Verwendung eines geeigneten Klebers. Sie sind ideal für Außen- und Innenumgebungen.

Les dalles de revêtement en pierre frittée CERA PANEL sont extrêmement faciles à installer, en effet, elles ne nécessitent que l'utilisation d'un adhésif approprié. Ils sont idéaux pour les environnements extérieurs et intérieurs.

RECTIFIED PRODUCT,
WHERE NOT MENTIONED THE MATERIAL MUST ALWAYS BE CONSIDERED AS RECTIFIED
Prodotto rettificato, ove non indicato il materiale è sempre da considerarsi rettificato
Produkt rektifiziert. Produkte ohne Angabe sind immer rektifiziert
Produit rectifié, lorsqu'il n'est pas mentionné le matériau doit toujours être considéré comme rectifié

NATURAL PRODUCT FROM MOLDING, UNRECTIFIED
Prodotto naturale da pressa non rettificato
Produkt kommt direkt aus der Form und ist nicht rektifiziert
Produit naturel de moulage, non rectifié.

THE SLABS ARE RECTIFIED BEFORE BURNING ON PART OF THE THICKNESS IN ORDER TO LOWER THE CONICITY TYPICAL OF UNRECTIFIED SLABS
Le lastre vengono rettificate a crudo su parte dello spessore al fine di ridurre la conicità tipica delle lastre non rettificate.
Die Platten werden vor dem Brennen auf einen Teil der Höhe Rektifiziert um bessere Eigenschaften wie bei der Naturkante zu haben.
Les dalles sont rectifiées sur une partie de l'épaisseur avant la cuisson pour réduire leur valeur typique de conicité.

THE SLABS INCLUDE SPACERS THAT GUARANTEE JOINTS THICKNESS AND REDUCE INSTALLATION DURATION
Le lastre includono distanziali ideati per garantire la fuga costante e ridurre i tempi di posa
Die Platten enthalten Abstandshalter, die die Breite der Fugen garantieren und die Verlegedauer verkürzen
Les dalles comportent des espaceurs qui garantissent l'épaisseur des joints et réduisent la durée de pose

---

COLOR WARNING

Color shades shown in this catalog are merely indicative because the printed output undergoes significant changes compared to the original color.
The color shade of the slab can vary between different sizes of the same color.

AVVERTENZA COLORE

I colori illustrati in questo catalogo hanno valore puramente indicativo in quanto la resa stampata subisce notevoli cambiamenti rispetto al colore originale.
Il tono colore della lastra può variare tra una misura e l'altra dello stesso prodotto.

FARBWARNUNG

Die in diesem Katalog gezeigten Farben sind nur als Hinweis zu verstehen, da die gedruckte Ausgabe im Vergleich zur Originalfarbe abweichen kann. Bei jeder neu produzierten Charge gibt es Farbabweichungen.

AVERTISSEMENT DE COULEUR

Les nuances de couleur présentées dans ce catalogue sont purement indicatives car la sortie imprimée subit des modifications importantes par rapport à la couleur d'origine. La couleur de la plaque peut subir des variations d'une mesure à l'autre.

LAYING ADVICE

It is advisable to create the appropriate transverse and longitudinal gradients during levelling or compacting, in order to ensure optimal drainage of the floor. We recommend the incorporation of a drainage substrate in order to facilitate runoff and prevent water pooling. It is also advisable to lay the slabs with a minimum joint of 3mm.
Given the frost resistance of sintered stone, the slabs offer a water absorption value closed to zero. This property could lead to localised pooling of water on the floor, even if the slabs are laid properly.

RACCOMANDAZIONI DI POSA

È bene prevedere le opportune pendenze trasversali e longitudinali da realizzare durante il livellamento o la compattazione per ottenere un drenaggio ottimale del piano di calpestio. Si raccomanda di prevedere un substrato realizzato con materiali drenanti per facilitare il deflusso dell'acqua ed evitarne il ristagno. Inoltre si consiglia una posa con fuga minima di 3 mm. Vista la caratteristica di ingelività della pietra sinterizzata, le lastre hanno il valore relativo all'assorbimento d'acqua praticamente nullo. Tale proprietà potrebbe comportare ristagni di acqua localizzati sulla pavimentazione, indipendentemente dalla realizzazione di una posa a regola d'arte del materiale.

EMPFEHLUNGEN FÜR DIE VERLEGUNG

Bei der Nivellierung und Kompaktierung müssen die notwendigen Quer- und Längsneigungen geschaffen werden, damit die ordnungsgemäße Drainage der Lauffläche möglich ist. Es wird empfohlen einen aus drainierendem Material bestehenden Unterboden, um das Abfließen des Wassers zu erleichtern und ein Anstauen zu vermeiden. Außerdem wird die Verlegung mit einer Mindestfuge von 3 mm empfohlen.
Aufgrund der Frostbeständigkeit des Feinsteinzeug hat die Platten einen Wasseraufnahmewert von praktisch Null. Diese Eigenschaft könnte, selbst bei fachgerechter Verlegung des Materials, zum Anstauen des Wassers auf dem Boden führen.

RECOMMANDATIONS DE POSE

On conseille de prévoir des inclinaisons transversales et longitudinales opportunes à réaliser au cours du nivellement et du compactage pour obtenir un drainage optimal du plan de piétinement. On recommande de prévoir un substrat réalisé avec des matériaux drainants pour favoriser l'écoulement de l'eau et en éviter la stagnation. On conseille également une pose avec un joint minimal de 3mm. Vu le caractère ingélif du grès cérame, la valeur d'absorption de l'eau de le dalles est pratiquement nulle. Cette propriété pourrait provoquer des stagnations d'eau localisées sur le carrelage, indépendamment de la réalisation d'une pose du matériel dans les règles de l'art.
